How to install Metamask extension in Google Chrome?

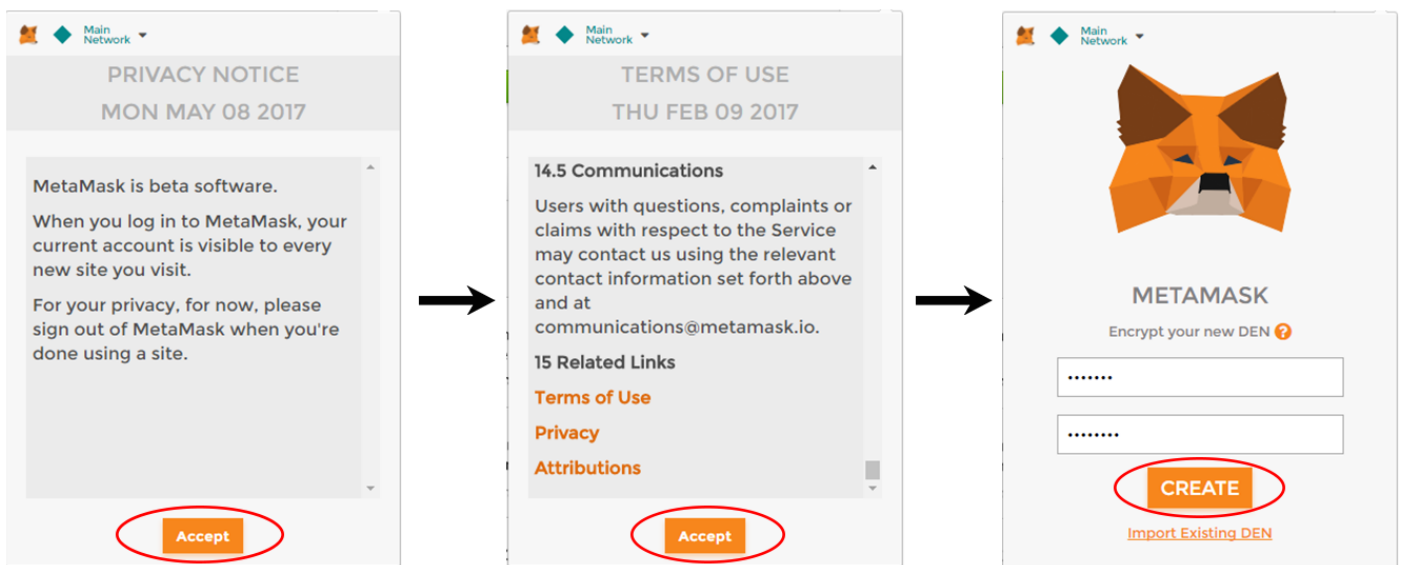

1. Search for Metamask in your Chrome browser or go to <https://metamask.io/> directly and click on GET CHROME PLUGIN

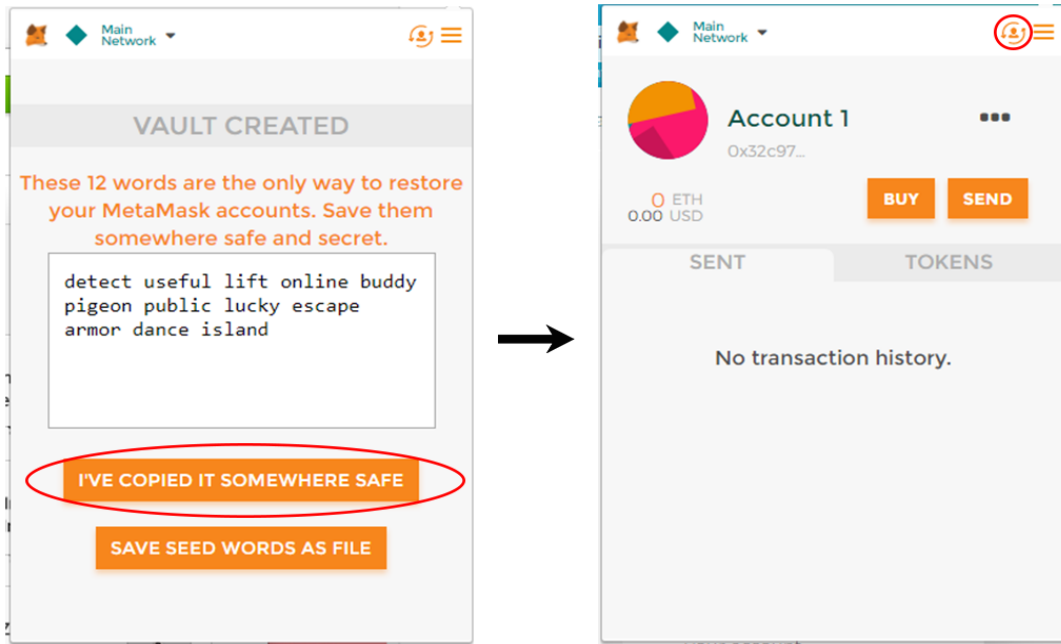

2. Click on the + ADD TO CHROME button to the add the plugin to chrome.

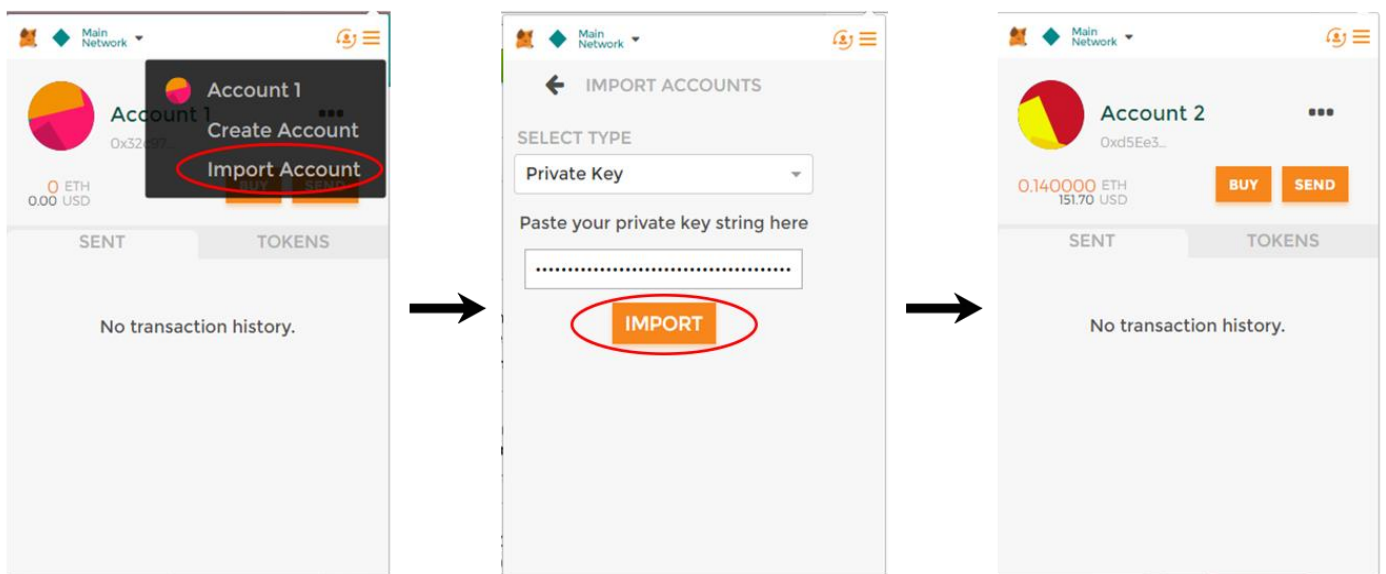

3. A new tab will open and the Metamask plugin is displayed at the right top of the chrome browser. Accept the Privacy Notice and scroll down and click **Accept** to agree on Terms of Use.
4. Fill in a strong password to use Metamask and click **Create**. *Don't Lose your password.*

5. Safe your secret 12-word recovery key somewhere safe and press I'VE COPIED IT SOMEWHERE SAFE to continue.
6. Now you can see the newly created account details.

7. Import the existing wallet into Metamask using import option.
8. You can import it using private key/JSON file. We prefer to import the wallet using Private Key, since sometime JSON import won't work properly
9. You can see the account details after importing to Metamask wallet under Account 2.

Adding Token to Metamask.

- a. Select Token tab and click on **ADD TOKEN** button.
- b. Enter the contract address as
0xfD107B473AB90e8Fbd89872144a3DC92C40Fa8C9
- c. And rest will be filled automatically and click on **ADD** button.
- d. Now you can view the token balance under the Token tab.
